OBJECTIVE

Junior Full Stack Developer with hands-on experience contributing to a live project, demonstrating a strong understanding of real-world development beyond tutorials. Skilled in project workflows, system architecture, and quick adaptation to new tech stacks. Passionate about building real applications that solve meaningful problems. Seeking a full-time opportunity to contribute effectively, continue professional growth, and become a reliable and skilled team member.

EDUCATION

Rajiv Gandhi University of Knowledge Technologies   *Sep 2022 – present*
Bachelor of Technology in Computer Science   **CGPA: 8.80**

Rajiv Gandhi University of Knowledge Technologies   *Jan 2021 – Sep 2022*
Pre University Course   **CGPA: 9.78**

SPCS Municipal Boys High School   *Mar 2020*
Secondary School Certificate   **GPA: 9.96**

WORK EXPERIENCE

MAHESYS IT SERVICES OPT PVT LTD   **Remote**
Python Full Stack Web Development Intern   April 2025 - July 2025

- Built a full-stack classified ads web portal using Django, and MySQL
- Designed responsive UI with Bootstrap and in otherhand learned about REST APIs
- Applied SDLC practices with focus on security, SEO, and deployment using Git and Render

SKILLS

- **Languages:** C, Python 3, SQL
- **Web Development:** HTML, CSS, JavaScript, Django, APIs, Bootstrap, Tailwind CSS
- **Databases:** MySQL
- **Tools/Platforms:** Git, Postman, Linux

PROJECTS

AI Blog Generator from Youtube videos   Code ↗   Demo ↗

- Designed a clean, responsive UI using Tailwind CSS.
- Built an AI-based web app that generates blog content from YouTube video transcripts via URL input with login system.
- Used Python 3 and Django for backend transcript processing and content generation.

CPU Scheduling Simulator   Code ↗   Demo ↗

- Designed a responsive web interface for user input and dynamic result display of scheduling metrics.
- Developed a CPU Scheduling Simulator using Django, Python, and Bootstrap, implementing the FCFS algorithm with real-time visual output.
- Followed modular, scalable design for easy integration of additional scheduling algorithms deployed on Render

ACHIEVEMENTS

- GATE CS 2025 Qualified (conducted by IIT Roorkee), with strong foundation in core computer science concepts
- Solved 300+ DSA problems across platforms like LeetCode and GeeksforGeeks

SOFT SKILLS

- Quick learner with a strong growth mindset, technical curiosity, and eagerness to explore new tools
- Strong problem-solving and analytical thinking across development tasks, with a focus on clean solutions

INTERESTS & HOBBIES

- Problem Solving on LeetCode
- Playing Football and Volleyball
